Angus Ranch

*33rd Annual Spring Bull Sale*

**FRIDAY, APRIL 21, 2023**

**1:00 PM MT**

**FAITH LIVESTOCK AUCTION • FAITH, SD**

# Welcome to the 33rd annual Pine Creek Angus Ranch Spring Bull Sale.

We appreciate your interest in our cattle program.

With the advancements in technology there are several tools available to help with the process of choosing the right sires for each of our cattle herds. We hope that the Angus GS testing we have done to our entire herd will help you with the choosing process. Angus GS verifies the parentage, so you know exactly who the parents are, and how that bull should perform in the future. If we can help you in your decision making, we would be happy to visit with you and answer any questions you may have.

We have always strived for balanced traits, but maternal traits remain our top priority. Our cows are moderate framed, easy fleshing, have adequate milk, good dispositions, and breed back every year. Out of over 400 cows ultra-sounded last fall only 7 were open. We do NOT offer second chances. We believe great cows are the heart of our program. We do all we can to care for our cows, and try to use the technology available to make the best decisions we can – because our cows are what produce the bulls we raise for you.

The bulls have been developed on a high roughage ration to reach their genetic potential without compromising their feet or fertility, and they get plenty of exercise.

The bulls have been fertility tested and scrotal measured by Scoggin Vet Service. This information will be available on our Facebook page and on the sale day supplement and order sheet.

You are welcome to stop by the ranch to see the bulls, their mothers, and also the 2023 calf crop sired by DL Summation, Sitz Profile, True North, Pine Creek Relevance, Pine Creek Accomplish, Man in Black, and Trail Boss. If you can't stop by before the sale to see our cattle we would invite you to go on the South Dakota State Angus Tour September 15-16, 2023. Our ranch will be one of the stops on September 15.

Our family would like to invite you to come early on sale day to see the bulls and have lunch with us before the sale.

### Announcements

Announcements made sale day will take precedence over any printed information.

### Retained Interest

Pine Creek Angus Ranch is retaining one third (1/3) revenue sharing semen interest in every bull selling in the sale.

### Delivery

FREE DELIVERY, up to 350 miles. We will keep the bulls, free of charge, until we deliver them or deduct \$100 per head from the purchase price if you take them home from the sale barn.

### First Breeding Season Guarantee

Bulls selling for \$3,500 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 60-day period following the first turn out of the bull. This is not mortality insurance. If a replacement bull is available, he will be provided or if the buyer prefers, credit towards one bull will be given for the following year's sale, less salvage value of the injured bull. All injured bulls must be diagnosed by a licensed veterinarian. We need to be notified should injury occur, and before the bull is sold for salvage. A copy of the salvage receipt must be sent to us. All claims must be made by Sept 1, 2023.

Pine Creek Angus Ranch will not be responsible for more than the purchase price of the bull.

Mortality Insurance will still be available for those who wish to purchase it.

### Insurance

Katie Williams of Martin Trudeau Insurance will be at the sale offering Livestock Mortality Insurance.

## American Angus Association \$Value Indexes

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

**ANGUS**  
 JUSTICE'S BREED

### Maternal Weaned Calf Value (\$M)

an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

### Beef Value (\$B)

an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

### Combined Value (\$C)

in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.
