

Jenson Ranch

Annual Bull Sale

Thursday, March 2, 2023

at Faith Livestock, Faith, SD

IT ALL STARTS
WITH THE
FEMALES!!

Selling 100 Bulls:

10 Fall Born Angus X Gelbvieh | 55 Angus x Gelbvieh | 30 Angus | 5 Angus X Simmental

Welcome,

Jenson Ranch

The Jenson Ranch hopes this catalog reaches everyone in good health and good spirits. Thanks to the legendary production sale that the Dave Lensegrav family built from the ground up, we have been privileged to continue building on that legacy at our own ranch in Harding County, SD. God blessed our ranches with plentiful rains last spring which led to outstanding grazing throughout the summer. The bulls were weaned off heavy on October 1st, and we again sent them to Senger Farms in North Dakota to go on feed. We built a ration for them to gain slow and steady at 3 lbs./day to ensure foot quality and longevity. The bulls will be transported from Senger Farms to Faith, SD, a day or two prior to the sale for viewing. Post-sale, we will finish developing them at a slow rate, back at the Jenson Ranch. The bulls will then be semen tested and delivered to your ranch for turnout around the first part of May. We cull extremely hard, and we are striving to make our cowherd better every year with females that are easy fleshing, eye appealing, have solid feet and legs, and are easy to handle. We would like to thank all of our previous customers for trusting in our program.

The Jenson's

Annual Bull Sale Thursday, March 2, 2023

1:00 p.m. • at Faith Livestock, Faith, SD
Lunch: 11:30 a.m. - 12:30 p.m.

Featuring 100 Bulls

10 Fall Born Angus X Gelbvieh,
60 Yearling Angus X Gelbvieh
25 Yearling Angus, and 5 Angus X Simmental

Raven No Doubt H58 "OJ"- OJ is a bull that we purchased from Raven Angus that is proving to be a big time breeding piece in our program with one of the top sire groups in this sale as well as some of the best females in the replacement pen. He is a bull that adds a tick of power and is backed by one of the best cow families in the angus breed. He is a smooth made, attractive bull that is super gentle and will eat cake out of ur hand. we are very excited to see these offspring go out and make a big impact on your herds. There is some real herd sire potential in this first offering of these sons. We own OJ with Taz and Casey Olson. "Taz picked the name, stands for Olson/Jenson he says"

What a performance standout to start off the catalog!!! A very gentle bull with loads of power and backed by one of the best cow families on our place, stemming down from the Y429 cow. Y429 has put 4 daughters back into production on our place with possibly the best heifer calf in the replacement pen, sired by this same great herd sire 'OJ'. If you are looking to stretch out cattle and add a little frame to your cowherd, look no further, as he has the tools to get it done for you.

A standout in this sire group and a bull that absolutely puts it all together. He has been at the top of my list for most of the year as he possesses that heavy made, moderate, soft package. He is packing weight in all the right places and strides out very well. His mother is a perfect uddered, moderate made female that is consistently AI bred. This future herd bull is the total package!!

One right after another in this 'OJ' sire group. This bull is strong from top to bottom and has herd bull capabilities backed by that beautiful young female that stems from the Y401 cow, being one of Ron's favorite cow families. The females in this family are moderate framed, great uddered, and sooooo deep!!! This bull will get you the best of both worlds; phenomenal females and a set of attractive steers that will pound that scale down!!!

Big time herd bull!!! This is one of the hardest bulls to let go in this offering!! We like them all but this one takes the cake. He comes from the most productive 2016 model cow on the ranch. This will be her 3rd bull to sell and has left me with 2 outstanding young females. She has Aled every year we have tried her and never misses on raising one of the best. This calf was born near perfect weight and was jettttt black!!!! This bull will be collected and used back in herd before delivery.

Stellar was our selection to AI most of our virgin heifers to and were sure glad we did. They came easy, started growing right away, and never looked back. They appear to be the perfect calving ease/maternal package. From an early standpoint, they seem to be solid on their feet and legs and are very gentle. This is very consistent and attractive sire group that will get you those functional females that we all strive for without sacrificing pounds on the steer side!!

Dave Lensegrav sure had a talent in raising bulls and Scout is just one of the results of many years of fine tuning his cattle. Scout comes from a line of females that I truly admire. We were fortunate enough to purchase both the mother and grandmother in the dispersion, and I tell you what, they are pretty special animals. They haven't missed a lick since they have got here. They breed back year after year, stand on a great set of feet, and have good udders. Both of these cows will prolly make a trip to the donor pen for a stint before they move on.

Look at the weaning and yearling weights this bull chalked up!! He has been a performance standout this whole year. It's no surprise with his stacked pedigree being out of a young Baldridge cow and Len Scout!!

REFERENCE SIRE

28 is a bull that dave raised that can absolutely get the job done from every angle. His females are proving to be outstanding in production as you will see quite a few young females sired by him with bull calves in this offering. He can sure put the added eye appeal on his bull calves as they express great muscle definition and style. Visionary 28 scrotal measured a 51 when Dave took him in last to get collected so if you are looking for those fertile females and set of steers you will be proud of, this would be the sire group.

We have been very please with the Powerball bull in the last few years and continue to use him for many reasons. As you can see in the stellar sire group, all of them are sired by Powerball daughters. We ventured in to breeding in to some of the balancer heifers and got some very nice offspring in doing that. By using Powerball, we can keep our mature size in check without sacrificing the body and mass. Very consistent on birthweight and the females are outstanding!! They were the gentlest set of heifers we have ever calved out.

It takes a while for breeding decisions to come around full circle but this was one that Dave strongly suggested after he saw our set of Powerball bull calves in the 2021 offering. He said, "you better be breeding that Powerball bull to some of these Gelbvieh cows because if the Gelbvieh cattle could use anything, it's depth, and these suckers have a ton of it." This dude has been a standout from early on and expresses a ton of muscle in a moderate framed, long spined package!! Throw a tick of that Gelbvieh in there and, by golly, I think we have a future herd sire that is going to cover all the bases extremely well!!!! Best part about it, he was born out of a nice 2 year old heifer at a modest 80 pounds, unassisted. Calving ease, lotta growth and man does he have the look!!!!

This bull is very similar to the Lot 31 bull. It makes sense because he is a 3/4 brother, along with Lot 36. It was a decision that was driven by their maternal qualities. Advance and Powerball complement each other well and combine to have the ability to make the cows that will thrive in this area and have a long career of raising heavy calves on little input.

Last of the Powerball x Advance 3/4 brothers. Why not save the best for last!!! This bull absolutely got it done in the feed test, outgaining his two 3/4 brothers to surpass them on the yearling weights. Not to take away from the other two, but we have just been really impressed with this young herd sire lately. His mother is a nice moderate female, and I am very excited to see what's in store for her.

LEN LEGEND 2

SIRE: LEGEND-VRD

DAM: 2 IN-FOCUS X 80B

This is an outstanding opportunity to get in on some timeless genetics. Legend 2 was a bull that dave found in the semen tank and said we absolutely needed to use. There are a number Legend 2 females walking our ranches and he was right, they are special special. We had a very limited supply of semen to work with so I was very cautious on the females I used. We ended up getting mostly females out of the matings but the two bulls in this offering show the sheer power behind the bull. We look forward to what they will do for you and you can guarantee you will see the female mates popping out some top end bulls for us in the future. There are often times I see something while I am out admiring cattle and when I see a Legend 2 in the top of a tag, it makes me think of the pure talent that Dave had in raising cattle. Special moments!!

69B has been one of our favorite cows that we got when we bought into Dave's herd. She is a striking model Gelbvieh cross cow that really just does everything right!!! Great feet, great udder, perfect sized female that never misses. Aled back once again with her 8th calf. Her dam, 7Z, was the exact same way. Hard to go wrong with proven, predictable genetics!!

Fall Bulls- We continue to grow our fall program from the original cows from Dave's herd. We are excited to grow this fall program, breeding our first set of heifers and slowly growing this herd solely based on quality. We are venturing into some embryo transplant work this coming fall so we can get some genetics from spring herd without actually moving cows to fall. We think these age advantage bulls are able to get out and breed more cows that first year and never really have to be pushed on feed. These bulls were weaned mid-March, turned out on grass in May, and starting the first of October we put them on a high roughage ration, projecting 2.5# gain per day. All of these fall bulls are sired by the Len Scout bull. Like I said previously in the yearling's section, these Scouts are just right for combination of power and maternal and the daughters are appearing to be some of the best we have ever raised.

94	623	1425	41.5

Here is a bull that has definitely exceeded expectations as far as performance. One of the heaviest, big boned bulls in the sale. No surprise with a pedigree like his. Big scrotal fall bull that will sire offspring that will pound down the scales!!

JR Lot 107 **LEN 107J-56C**
 BD: 8/30/21 RED PP 3/8 GV

BABR BRANDED MAN 3400A
 MADD "HANK" 701

 W415X

BW	Adj. WW	Adj. YW	Scrotal
92	620	1190	40.0

Youngest of the fall bulls but he's right there in terms of eye appeal and performance. His dam is a capacious female with a perfect udder. This is another cow that has produced top end offspring for many years. She is the kind of female that we love to have around!

Dam of Lot 107

JR Lot 109 **JEN 109J-82B**
 BD: 8/15/21 HETERO PP 3/8 GV

 B350Y- DERRY POWER PLANT

BW	Adj. WW	Adj. YW	Scrotal
90	605	1280	41.0

Solid fall bull out of a female that is proving her ranks right at the top!! She has a tick more frame but is always in good rig!! Finally, the last bull in the catalog which means we're done writing!! Until next year!
