+ Angus

**November 29, 2019 | 1 PM MT**  
Faith Livestock Auction, Faith SD

# Wilken Angus

## **Vision Statement:**

We desire to equip our customers with the most profitable seed stock in the industry, through exclusive use of high accuracy AI genetics and rigorous culling of our cow herd. Our goals of consistent calving ease, maternal easy fleshing females, and moderate to high growth cattle with positive carcass qualities are in place to ultimately serve our customers with success through every cattle cycle.

## **Sale Day & Time:**

Friday, November 29, 2019 -- 1 p.m. MDT

## **Sale Location & Sale Day Telephone:**

Faith Livestock Auction -- 605-967-2200

Dace Harper -- 605-515-1535

Mason Dietterle -- 605-580-5878

## **Auctioneer:**

Doug Dietterle -- 605-788-2963

## **Delivery & Wintering:**

We offer free wintering of your bull. If you take your bull home on sale day, you will receive a \$500 deduction. You will receive a \$400 deduction if we take your bull home on sale day and deliver in the week following the sale; or we will winter your bull and deliver it the first part of May

## **Semen Testing and Ultrasound Data**

The bulls have been fertility-tested by Dr. Bleaux Johnson of West River Vet Clinic and ultra-sounded by Dan Hines.

## **Guarantee:**

Wilken Angus guarantees all bulls against any injury that would keep them from being a breeder for the first breeding season. If a problem occurs, return the bull and a full credit will be given towards next year's bull sale, or a suitable replacement will be provided if available. The buyer will choose the preferred option. All claims must be made by 10/15/2020.

## **Live Video Auction:**

Live video auction and bidding will be available sale day through Cattle USA. Please pre-register by Tuesday, November 26, 2019 at [www.cattleusa.com](http://www.cattleusa.com).

## **Sale Day Reps:**

Donnie Leddy, Cattle Business Weekly, 605-695-0113

Dan Piroutek, Tri-State Livestock News, 605-544-3316

Scott Dirk, Tri-State Livestock News, 605-380-6024

Mason Dietterle, 605-580-5878

Beau Ravellete, RPI Promotions, 605-685-8155

## **Lunch:**

Complimentary lunch beginning at 11:00 AM.

**For you early birds, Katie will be serving Made-To-Order Omelets before you start looking at the bulls.**

## **Volume Discounts:**

Buy three bulls- 3% discount; four bulls- 4%; 5 bulls- 5%; on up to a maximum of 10 bulls-10% discount.

## **Zoetis 50K Genetic Testing:**

We are pleased again this year to have the Zoetis 50K testing. 50K testing uses a sample of each of our bull's DNA to dependably determine their genetic potential. The bulls selling have been sire verified through the 50K genetic testing.

**See page 41 for more information on 50K genetic testing information provided.**

## **Individual Docility Score:**

We have instituted a docility score that is specific to our bulls. This is NOT AN MVP. It is a subjective score derived from our personal evaluation of each bull. A bull would have to be rated 1-3 in order to qualify for our sale.

- 1 - Extremely Gentle
- 2 - Docile
- 3 - Restless
- 4 - Flighty
- 5 - Aggressive
- 6 - Very Aggressive.

## Hello from Wilken Angus!

Wow! It has been a year to remember marked by many extremes.....All in all, there have been a lot of blessings along with a few challenges.

It feels like forever since we had our last sale. That is due in large part to the fact that for the first time we did not host our spring sale and have gone exclusively to selling long aged bulls.

The eight sire groups we have to offer this year deliver PROVEN genetics and each provide unique strengths. As you strive to improve your cattle program, these genetics will assist you in accomplishing this goal. I believe these proven genetics, combined with a range hardened cow herd, and a potent, unpampered coming two year old bull gives you the best possible product that we can deliver. Join us on Friday, November 29th, to take advantage of these benefits and to move your program forward.

With Thanksgiving quickly approaching, it's a great time to reflect on God's goodness and give thanks to Him! We consider our customers and friends as a blessing and are thankful to spend time over Thanksgiving weekend with each one of you!

Mytty In Focus is a highly proven calving ease sire and has produced some of the top sires in the industry. We like our In Focus dams; they are productive, moderate framed, and very gentle.

### MPPA

#### Most Probable Producing Ability

You will see the Dam's MPPA listed on many of the bulls throughout the catalog. The MPPA is a performance ratio by which you reliably can compare a dam's past production.

Resource is a highly-proven sire, which has consistently sired depth, muscle and fleshing ability in the right package. Our two-year-old Resource daughters that we calved out were gentle, easy-keeping with very nice udders. These Resource sons will also improve foot quality. Use these Resource sons to produce a sale topping steer calves and heifers that will control frame size and be the "keeping" kind.

Select Top Game 561X sons for increased performance, added length. Top Game is a breed leader for muscle and rib eye genetics. These Top Game sons travel well with excellent leg structure and feet quality. The Game Day 449 daughters are very productive and perfect udders. Use Sitz Top Game sons to increase weaning values as he is in the top 2%. The fertility in Sitz Top Game proved to be very good because our conception with this bull was amazing.

## What are MVPs?

MVPs or Molecular Value Prediction are the predicted genomic breeding values for animals, based on the sum of the effects of the associated markers, expressed in units of measure for the trait. Similar to EPDs, MVPs rank animals for genetic merit and are expressed as deviations in performance from a set base-point for each trait. One-half of the difference in genomic breeding values between animals is transmitted to offspring.

## What are Percentile Rankings (%)?

Percent ranks are based on the animal's MVP for each trait as compared to the overall population of Black and Red Angus animals in the Pfizer global database. Rank values indicate the 'top' position of the animal in the population, with lower values generally indicating higher and more favorable genetic merit for most traits. Traits of exception may include milking ability, yearling and mature height, mature cow weight and fat thickness, where lower percentage values generally indicate genetic merit for higher levels of milk and larger size, and higher associated feed requirements, and potentially less maternal adaptability

---

### Calving Ease Direct

Describes differences in genetic merit for the likelihood of un-assisted births in first-calf heifers, expressed as a trait of the progeny. Higher MVP values and lower ranks are preferred, especially when selecting sires for use on replacement heifers for easier calving progeny.

### Birth Weight (BW)

Quantifies genetic differences in birth weight, with lower and moderate MVP values and ranks generally desired for ease of calving.

### Weaning Weight (WW)

Measures difference in genetic merit for adjusted 205-day weaning weight, with higher MVP and lower rank values indicating heavier weights.

### Yearling Weight (YW)

Indicates differences in breeding value for adjusted 365-day weight, with higher MVPs and lower ranks equating to genetics for heavier yearling weights.

### Milking Ability (MILK)

Evaluates differences in genetic merit for the maternal component of calf weaning weight, predominantly due to milking ability of dams (or daughters). Genetic potential for milking ability should be matched to available feed resources, which implies that intermediate MVP and rank values are likely optimum for many production systems.

### Scrotal Circumference (SC)

Describes genetic differences in age at puberty as indicated by adjusted yearling scrotal circumference. Larger MVPs and lower ranks for scrotal circumference equate to genetics for earlier and more desirable age at puberty in both bulls and heifers.

### Marbling Score (MARB)

Quantifies genetic differences in USDA marbling scores at a constant age, with higher MVPs and lower ranks indicating higher levels of marbling and generally more desirable quality grades and associated carcass premiums.

### Ribeye Area (REA)

Describes genetic variation in carcass muscularity as measured by ribeye area between the 12th and 13th rib, at a constant age. Larger MVPs and lower ranks for ribeye area favorably impact USDA yield grades and associated carcass premiums.

### Molecular Value Prediction - Feedlot Index (\$MVPFL)

Predicts net return from combined genetic merit for feedlot (FL) gain, dry matter intake, carcass weight, as well as USDA quality and yield grades (marbling, ribeye area and fat thickness). The index assumes approximately 160 days on feed consuming concentrate rations and carcass value derived from a Certified Angus Beef (CAB) grid. Higher MVPs
