

Wilken + Angus

TURNOUT BULL SALE

Monday, June 6, 2022 at 1 p.m. MT
Faith Livestock Auction, Faith, SD

Wilken + Angus

Hi Friends,

Wow! It has been a crazy six months! Since our fall bull sale my Dad passed away, two daughters have gotten married, I got one new hip, three new foster children, ages 2,3,4, and a couple pretty fair blizzards during calving.

You all could probably write your own list of craziness. One huge blessing that we have received from the Lord this spring is some much needed moisture. We trust that you have all received some as well.

The bulls in the sale are all first time offered. Some of these bulls were used on heifers but have been trich tested. This powerful set of bulls have all been fertility-tested and are ready to go work.

Gary and Lori Wilken

Sale Day & Time:

Monday, June 6, 2022 at 1 p.m. MDT

Sale Location & Sale Day Telephones:

Faith Livestock Auction, Faith, SD, (605) 967-2200

Dace Harper, (605) 515-1535

Mason Dietterle, (605) 580-5878

Auctioneer:

Doug Dietterle, (605) 580-1362

Semen Testing and Ultrasound Data

The bulls have been fertility-tested and ultra-sounded by Dan Hines. All bulls have been fertility-tested last fall and this spring.

Guarantee:

Wilken Angus guarantees all bulls against any injury that would keep them from being a breeder for the first breeding season. If a problem occurs, return the bull and a full credit will be given towards next year's bull sale, or a suitable replacement will be provided if available. The buyer will choose the preferred option. All claims must be made by October 15, 2022.

Live Video Auction:

Live video auction and bidding will be available sale day through Cattle USA. Please pre-register by Tuesday, May 31, 2022

Sale Day Reps:

Donnie Leddy, Cattle Business Weekly, 605-695-0113

Mason Dietterle, 605-580-5878

Zoetis 50K Genetic Testing:

We are pleased again this year to have the Zoetis 50K testing. 50K testing uses a sample of each of our bull's DNA to dependably determine their genetic potential. The bulls selling have been sire verified through the 50K genetic testing. **See page 15 for more information on 50K genetic testing information provided.**

Individual Docility Score:

We have instituted a docility score that is specific to our bulls. This is NOT AN MVP. It is a subjective score derived from our personal evaluation of each bull. A bull would have to be rated 1-3 in order to qualify for our sale.

1 - Extremely Gentle

4 - Flighty

2 - Docile

5 - Aggressive

3 - Restless

6 - Very Aggressive.

Raindance is the perfect outcross option for many popular lines of cattle to add body length, eye appeal and the maternal power of the great Blackcap and sire Coleman Charlo 0256. These Raindance sons exhibit the extra muscle and length that Commercial cattlemen are looking for as well as improved foot quality.

The Tahoe cattle have impressed us, and we have used hard the last three years. We think that Tahoe will have a substantial positive impact on the Angus breed. Use these powerful Tahoe sons to improve carcass quality while adding eye appeal and dimension. He is a proven, multi-purpose sire that is one of the most complete bulls in the Angus breed.

MAR Innovation is a new bull for us. He caught our eye for his length of body, extra depth, and capacity. A highly proven bull with a big scrotal that should add fertility, foot quality, and docility.

Lori and I saw Emblazon 999 at Genex in Billings, MT. We were impressed with his extra length and power while offering a touch more frame and tremendous thickness, capacity, and fleshing ability. We are pleased to see the sons demonstrate a consistency in fleshing ability and thickness. The daughters are reportedly ideal with excellent udder quality. Emblazon 999 is a graduate of the ABS Sire Alliance and ranks in the top 3% for Feed Efficiency, and the top 10% for Total Profit and Maternal Indexes.

We used Hoover Dam several years ago and still have a lot of Hoover Dam daughters in our herd. They are some of our very favorites, so we chose to use him again. Hoover Dam has truly established a brand name reputation for calving ease, muscle, and maternal strength.

Our days are not quite the same without daily visits and coffee time with Granddad, but we are so thankful for his legacy in ranching and how he lived his daily life. We are also thankful for my Uncle George, who passed away in November 2021. Dad and George were humble, hard-working men who loved the Lord, their families, and each other. We are thankful for them!

Zoetis 50K Testing Reference Info**Calving Ease Direct**

Describes differences in genetic merit for the likelihood of unassisted births in first-calf heifers, expressed as a trait of the progeny. Higher MVP values and lower ranks are preferred, especially when selecting sires for use on replacement heifers for easier calving progeny.

Birth Weight (BW)

Quantifies genetic differences in birth weight, with lower and moderate MVP values and ranks generally desired for ease of calving.

Weaning Weight (WW)

Measures difference in genetic merit for adjusted 205-day weaning weight, with higher MVP and lower rank values indicating heavier weights.

Yearling Weight (YW)

Indicates differences in breeding value for adjusted 365-day weight, with higher MVPs and lower ranks equating to genetics for heavier yearling weights.

Milking Ability (MILK)

Evaluates differences in genetic merit for the maternal component of calf weaning weight, predominantly due to milking ability of dams (or daughters). Genetic potential for milking ability should be matched to available feed resources, which implies that intermediate MVP and rank values are likely optimum for many production systems.

Scrotal Circumference (SC)

Describes genetic differences in age at puberty as indicated by adjusted yearling scrotal circumference. Larger MVPs and lower ranks for scrotal circumference equate to genetics for earlier and more desirable age at puberty in both bulls and heifers.

Marbling Score (MARB)

Quantifies genetic differences in USDA marbling scores at a constant age, with higher MVPs and lower ranks indicating higher levels of marbling and generally more desirable quality grades and associated carcass premiums.

Ribeye Area (REA)

Describes genetic variation in carcass muscularity as measured by ribeye area between the 12th and 13th rib, at a constant age. Larger MVPs and lower ranks for ribeye area favorably impact USDA yield grades and associated carcass premiums.

Molecular Value Prediction - Feedlot Index (\$MVPFL)

Predicts net return from combined genetic merit for feedlot (FL) gain, dry matter intake, carcass weight, as well as USDA quality and yield grades (marbling, ribeye area and fat thickness). The index assumes approximately 160 days on feed consuming concentrate rations and carcass value derived from a Certified Angus Beef (CAB) grid. Higher MVPs and lower ranks indicate more desirable combined genetic merit.
