Annual Coming 2 Year Old Bull & Bred Heifer Sale

FRIDAY, DECEMBER 15, 2023

1:00 PM MT • FAITH LIVESTOCK AUCTION • FAITH, SD

Welcome to our 3rd Annual Fall Production Sale

We appreciate your interest in our cattle program.

There are a lot of tools available to help with the process of choosing the right sires for each of our cattle herds, and we hope that the testing that we have done in our herd with Angus GS will help you with that process. It verifies the parentage, so you know exactly who the parents are, and how that bull should perform in the future. If we can help you in your decision making we would be happy to visit with you and answer any questions you may have.

As we have always said - we strive for balanced traits, but, maternal traits are our top priority. Our cows are moderate framed, easy fleshing, have adequate milk, good disposition, and breed back every year. We do NOT offer second chances. We believe great cows are the heart of our program, and try to use the technology available to make the best decisions we can.

The bulls were developed on a high roughage ration last winter then turned out to pasture May 1 through Sept 30.

The bulls will be fertility tested and scrotal measured Dec 5 by Scoggins Vet Service. This information will be available on our website, PineCreekAngusRanch.com, Facebook page, and on the sale day supplement sheet.

The bulls were given Dectomax injectable and poured with Clean-up2.

The bred heifers were A.I.ed May 4 and 5 and turned out to grass May 7. Clean-up bulls were turned in May 20. They were ultra sound tested July 24. This fall they were given Dectomax injectable, Cattlemaster Gold FP5 L5 and poured with Clean-Up2. They had their first dose of Guardian on Nov 24. Heifers will be retested on Dec 5.

Cattle can be viewed here at the ranch until Dec 12 and in Faith the afternoon of the 13 through the 15.

Our family would like to invite you to join us sale day. Please, come early and look at the bulls, and heifers. Have lunch with us before the sale.

American Angus Association \$Value Indexes

Dollar value indexes, or \$Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

Maternal Weaned Calf Value (\$M)

an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Beef Value (\$B)

an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C)

in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.
